Pritchard & Abbott Appraisals	5912 W Amarillo Blvd Amarillo, TX 79106	806-358-7837	

Purpose

The purpose of this Disaster Recovery and Mitigation Plan is to prepare the Ochiltree County Appraisal District in the event of extended service outages caused by factors beyond our control (e.g., natural disasters, man-made events), and to restore services as rapidly as possible to the widest extent possible when an incident occurs.

Scope

The scope of this plan is limited to getting the Appraisal District “up and running” in the event that major components are lost, preventing the full functioning of the District and to help in mitigating loss. This is a business continuity plan, not a daily problem resolution procedures document.

Plan objectives

- Serve as a guide for the recovery.
- Reference and points to the location of critical data.
- Provide procedures and resources needed to assist in recovery.
- Identify vendors and customers that must be notified in the event of a disaster.
- Document storage, safeguarding and retrieval procedures for vital records.

Assumptions

- Key people will be available following a disaster.
- This document and all vital records are stored in secure off-site locations either in electronic format or hard copy, and should not only survive the disaster but be accessible immediately following the disaster.

Disaster definition

Any loss of utility service (power, water), connectivity (system sites), or catastrophic event (weather, natural disaster, vandalism) that causes an interruption in the service provided by the District. The plan identifies vulnerabilities and recommends measures to prevent extended service outages.

Team member responsibilities

- The Chief Appraiser will oversee the recovery and is the decision maker in any emergency.
- Cristal Tarango will assist the Chief Appraiser and will serve as her alternate in the event the Chief Appraiser is unavailable. All other staff will assist them.
- The members of the Board of Directors will be apprised of all aspects of the recovery and may be called upon to assist in the recovery.
- Members of the Board of Directors will oversee the recovery in the absence or unavailability of the Chief Appraiser and other office staff.
- All of the members should keep an updated calling list.
- All team members should keep this plan for reference at home in case the disaster happens after normal work hours. All team members should familiarize themselves with the contents of this plan.

Instructions for using the Recovery Plan

Invoking the plan - This plan becomes effective when a disaster occurs.

Disaster declaration – The Chief Appraiser and/or the Board of Directors are responsible for declaring a disaster and activating the recovery plan.

Notification - Regardless of the disaster circumstances, this plan will be activated immediately in the following cases:

- Damage to the building or IT systems incurring a prolonged cessation of services of more than three days.
- Cessation of utilities (electricity, gas, water) for more than three days.
- Where either of the above conditions are about to occur.

External communications - The Chief Appraiser is designated as the principal contact with the media (radio, television, and print), regulatory agency, government agencies, and other external organizations following a formal disaster declaration.

Emergency management & mitigation standards

Data backup policy - Backup media is stored at locations that are secure, isolated from environmental hazards, and geographically separate from the location housing the system. Specific employees and third parties are tasked with testing the backups to make sure they are working correctly.

Full and incremental backups preserve the District's information assets and will be performed on a regular basis as follows:

- Backups of appraisal/collections software and files are stored offsite at the programmer's location. The Appraisal District is using a web-based software package for appraisal and collections which is maintained by Pritchard and Abbott, Inc.
 - In addition, backup of the appraisal/collection's software made once a week is stored on the Appraisal District server.
 - The District's bookkeepers are responsible for running the daily backups of their information and each staff member makes back-ups of their own documents which are usually backed up to the server, which is itself backed in several ways, one being that the Chief Appraiser backs it up once a month to an external hard drive which stores off-site.
- In addition to the backups mentioned above, BIS, the District's IT provider has installed an external hard drive. Information is automatically stored to this device.
 - This device is attached to the back of the server located in the supply room at the District.
 - In the event of an impending disaster where the device could be destroyed, it may be removed and stored in a secure, geographically separate location and isolated from environmental hazards.

Cameras- In an effort to mitigate loss the appraisal district has installed a camera (Blink) in the front office, which is monitored on an iPad located in the Chief Appraiser's office.

Systems and Software

OCHILTREE COUNTY APPRAISAL DISTRICT			
Hardware	Description	Puch Date	Notes
Database Server	PowerEdge T440	05/18/2024	21" Monitor, Keyboard, mouse

Recliner Office Chair	On rollers	2024 2024	Julia's Office Julia's Office

In the event of an emergency of any kind - that may affect the facility or information systems, please follow the procedure below.

Procedure

STEP	ACTION
1	Notify the Chief Appraiser. The Chief Appraiser or designee will function as decision maker in any emergency.
2	Assess the situation and determine if outside assistance is needed; if this is the case, dial 9-1-1 immediately.
3	Immediately notify all other personnel in the facility of the situation and be prepared to cease operations accordingly.
4	If an alternate location is necessary, Chief Appraiser or designee will initiate relocation to the VFW building at 1301 TX-15 Perryton, TX 79070. Which will function as OCAD's emergency location.

In the event of a fire – The steps listed under emergency above will be followed. Because of the speed with which a fire can move, the first priority in the event of a fire will be the safety of the employees. Most fires can turn into something major quite rapidly, so calling for help will be a major priority. Office personnel will evacuate the facilities and meet in the north or east parking lot depending upon which door is not blocked by fire.

In the event of a flood or of water damage – The steps listed above will be followed. If the situation permits and there is no eminent danger, salvaging documents and equipment will be a priority.

Planning and preparedness – Employees and board members have received a copy of this policy, and it is reviewed periodically at staff meetings. Employees are encouraged to become familiar with their role in the case of disaster.

Plan review and maintenance - This plan must be reviewed annually. Testing is to be carried out at the discretion of the Chief Appraiser. The test may be in the form of a walk-through. Additionally, review the listing of personnel and phone numbers contained within the plan.

- The hard-copy version of the plan will be stored in a common location where it can be viewed by District personnel. Electronic versions will be available via network on our server.

AFTER THE DISASTER

Decide course of action - Based on the information obtained, the Chief Appraiser with the help and approval of the Board of Directors if advisable will decide how to respond to the event: mobilize IT, repair/rebuild existing site(s), or relocate to a new facility.

Contact general vendors (see emergency contact list) – Within first 24 hours

Conduct detailed damage assessment. – Within 48 – 72 Hours

- Under the direction of local authorities, assess the damage to the affected location and/or assets. Include vendors/providers of installed equipment to ensure that their expert opinion regarding the condition of the equipment is determined ASAP.
 - Conduct an on-site inspection of affected areas to assess damage to the building, equipment, furniture and fixtures, hardcopy records (files, manuals, contracts, documentation, etc.) and electronic data.
 - ❖ Obtain information regarding damage to the facility (s) (e.g., environmental conditions, physical structure integrity, furniture, and fixtures).
- Develop a restoration priority list, identifying facilities, vital records and equipment needed for resumption activities that could be operationally restored and retrieved quickly.
- Make recommendations for required/needed resources.
- Make arrangements for relocation to the emergency site (County VFW building) if needed. With connectivity to the internet, OCAD can restart operations since the appraisal/collections software as well as the map software are all web based.

Re-establish normal operations – within one/two weeks

- ***Notify the Software Vendor and Offsite Backup Provider staff/Coordinate relocation to new facility (if necessary).*** Work with vendors to develop a rebuild/repair schedule. Coordinate removal of salvageable equipment at disaster site that may be used for alternate site operations

Secure funding for relocation - Make arrangements to acquire a suitable location and equipment and other resources. Make arrangements with local banks, hotels, office suppliers and others for support. Because OCAD uses web-based appraisal/collections software, employees could work from home during a relocation period.

Operations recovered - Assuming all relevant operations have been recovered to an alternate site, and employees are in place to support operations, the district can declare that it is functioning in a normal manner at the recovery location.

Appendix

Appendix A: EMERGENCY PROCEDURES IN CASE OF A TORNADO

Specifically - WHEN A TORNADO WARNING IS GIVEN IN OUR AREA

1. PUT MONEY IN SECURE PLACE – Cashier/Receptionist and Registered Tax Collector/Assessor
2. EACH STAFF MEMBER GET PURSE/OTHER PERSONAL ITEM TO BE TAKEN IF ANY
3. CHIEF APPRAISER OR CRISTAL TARANGO IN Her ABSENSE DETERMINE IF OTHER EQUIPMENT SHOULD BE SECURED AND ASSIGN TASKS
4. TURN OFF COMPUTERS – Each employee at their own station
5. STAFF SEEK SHELTER AT THE NEAREST TORNADO SHELTER
